

Countdown to Africa's biggest coatings show

The biggest coatings show in Africa – Coatings for Africa 2018 will take place at the Sandton Convention Centre from May 29-31.

// THE SHOW IS THE LARGEST DEDICATED COATINGS EVENT IN AFRICA FOR RAW MATERIAL, SERVICE SUPPLIERS, EQUIPMENT AND PAINT MANUFACTURERS IN THE COATINGS INDUSTRY //

THIS MAJOR SHOWCASE of paint, coatings products and technology is being staged by the South African Paint Manufacturing Association (SAPMA) and the Oil and Colour Chemists' Association of South Africa (OCCA).

Terry Ashmore, chairman of SAPMA, says the show is the largest dedicated coatings event in Africa for raw material and service suppliers, equipment manufacturers and paint manufacturers in the coatings industry. "The origin of the show dates back to a series of technical conferences arranged by OCCA throughout South Africa, culminating in a biennial conference at Champagne Sports Centre in the Drakensberg, KwaZulu-Natal. In 2010, a cooperative agreement between OCCA and SAPMA was concluded and the show was moved to the more central location of Johannesburg under its present 'Coatings for Africa' title," he stated.

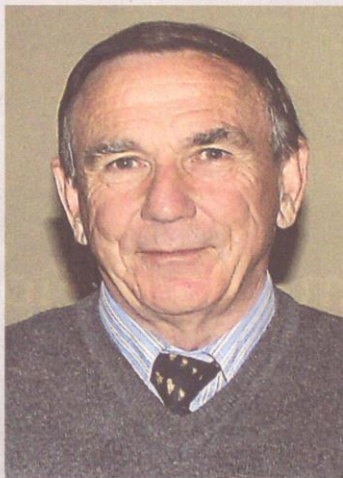

Ashmore says the Coatings for Africa Show 2018 will collate the components and expertise of the paint and coating industries' manufacturing, raw material and equipment suppliers, as well as global technology transfer experts. "This year it will be staged by vastly

experienced and successful coatings show organisers, for a three-day event that will promote the latest technology for the entire continent's environmental, manufacturing and industrial needs. The show will provide the coatings industry members the opportunity of spending time exploring business requirements, establishing meaningful international networking partnerships, and meeting representatives and decision-makers from the world's leading manufacturers and suppliers," he explained.

Coatings for Africa 2018 will have a broader interest base through the expansion of subject

matter from the all-important transfer of technology to include global management challenges, with a full day being set aside for 'Issues that keep coatings CEOs awake at night'.

In addition, a series of free business presentations will be given by exhibitors in the exhibition hall. "The show will be a celebration of coatings and we are looking forward to a record attendance," added Ashmore. <<
